# Assignment 1: NLP Text Evaluation System

**Practical Assignment**

**Develop an NLP-based Text Evaluation System** that accepts a paragraph as input and performs the following operations:

1. Read the input text from the user.
2. Perform **text cleaning and normalization**.
3. Apply **tokenization**.
4. Remove **stop words**.
5. Apply both **stemming and lemmatization**.
6. Display the processed text after each step.
7. Classify the processed text as **Positive or Negative**.
8. Generate a **confusion matrix** using actual and predicted labels.
9. Calculate **Precision, Recall, and F1-Score**.
10. Display the final evaluation results in a clear format.

**Requirement:** Implement the complete system using **Python and NLP libraries** such as NLTK or spaCy.
